

President's Message:

Winter has been tough on us all, and I'm sure budgets are being significantly strained by now. We need a reprieve from this weather and hope for an early spring with warm temperatures.

WCAMPWA's salt committee has been working with many of you to address the concerns that have been raised with delivery and quality of the salt product. We have been successful up to this point and have some additional work to do and need your help to formulate our next serious discussion with both the OGS and Atlantic Salt Co, - that is the issue of excess requirements for salt beyond the 120%. This may have some significant cost implications given the winter experience thus far.

Many of you have responded to our recent e-mail blast on this. Please e-mail Craig Useted @ cncastlehighway@optonline.net with what your % is to date as well as your estimated tonnage of the "Irish" salt that was delivered to you.

Also, WCAMPWA's committee dealing with ConEd patch and restoration concerns is planning on having yet another meeting with ConEd to show them what the problems are and how they need to respond. Steve Johnson has taken the lead on the committee to gather the information for the next meeting. Please send Steve sjohnson@Pleasantville-ny.gov your problem locations (with photos) and any other item of concern that would be helpful to present to ConEd.

The Stormwater Workshop has been set for Wednesday, April 22, 2009; registration forms will be available soon. The list of speakers and topics promise to be very informative.

Also, the Golf Outing has been set for Monday June 29, 2009; details are included with this newsletter.

Hope to see you at the meeting!!!

Benedict Salanitro, PE
President
